MADHUMITHA N.S.

Blockchain Developer | Web3 | Solidity | Ethereum | Smart Contracts | DEX

Tiruppur, Tamil Nadu madhumitha200616@gmail.com| +91 8248744420 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Integrated M.Tech Computer Science and Engineering student with a 9.43 CGPA and hands-on Web3 development experience. Currently contributing as a Blockchain Developer at Quantumqlabs, working on decentralized trading applications, EVM smart-contract integration, wallet connectivity, token management, and DEX trading flows. Experienced with Solidity, Ethereum, Sepolia, ERC-20, ethers.js, wagmi, Uniswap V3, Java, MongoDB, Git, and Foundry.

TECHNICAL SKILLS

Blockchain / Web3: Solidity, Ethereum, EVM, Sepolia, ERC-20, Smart Contracts, DEX Development, Uniswap V3, ethers.js, wagmi, Wallet Integration, Token Management, Transaction Execution

Programming: Java

Database: MongoDB, SQL

Developer Tools: Git, GitHub, MetaMask, Remix, Foundry, MongoDB Compass, Vite, Tailwind CSS

PROFESSIONAL EXPERIENCE

Blockchain Developer | Quantumqlabs | Jul 2026 – Present

- Develop decentralized trading features within a modular application architecture.
- Integrate Solidity smart contracts with Web3 workflows using ethers.js for wallet connections, transactions, token operations, and EVM interactions.
- Implement DEX functionality around token swaps, wallet connectivity, network switching, token management, and transaction execution.
- Diagnose wallet, RPC, token-address, liquidity, and transaction issues across decentralized application workflows using Git/GitHub-based development.

Web Development Intern | Litz Tech | Oct 2025 – Nov 2025

- Completed a 30-day web development internship with practical exposure to website development technologies.
- Contributed to collaborative development tasks while strengthening debugging, teamwork, and practical web development skills.

PROJECTS

ElixSwap — Multi-Chain Decentralized Trading Platform | Quantumqlabs | In Development

- Build modular Swap, Markets, Portfolio, History, and Pro Trading views with reusable components.
- Integrate EVM smart-contract workflows with Solidity, ethers.js, and Foundry for swap execution, transaction simulation, and execution safeguards.
- Develop wallet connectivity, network switching, token management, and transaction flows for decentralized trading workflows.

Nexora DEX — Decentralized Exchange on Ethereum Sepolia | Personal Project

- Construct a decentralized exchange interface with Ethereum Sepolia smart-contract integration.
- Implement Uniswap V3 QuoterV2 and SwapRouter02 flows for token swapping, pool and fee-tier detection, on-chain price quoting, price impact, slippage protection, and gas estimation.
- Manage ETH/ERC-20 balances and wallet interactions; create custom ERC-20 contracts using Solidity and OpenZeppelin.

TeamChain Wallet — Web3 ERC-20 Hub | Personal Project

- Develop a Web3 wallet application for Ethereum Sepolia wallet connectivity and ERC-20 token management.
- Resolve wallet, network, and transaction issues while refining responsive Web3 user flows.

BlackBox Accident Detection System | College Research Project

- Explore an IoT-based accident-detection system using sensor data and blockchain-secured storage; present the related research paper at NCTIACS-26 on 26 Feb 2026.

AI GPU Cost Monitor | Personal Project

- Build a dashboard to track AI/GPU usage costs and monitor infrastructure spending. Present cost data in a clear, easy-to-review interface. Live Project

ATS Engine | Personal Project

- Develop an applicant-tracking tool to evaluate resumes against job requirements. Highlight relevant skills and gaps to support resume screening. Live Project

EDUCATION

Erode Sengunthar Engineering College | 2023 – 2028

Master of Technology, Computer Science and Engineering (5-Year Integrated) | CGPA: 9.43 (up to 6th semester)

Sri Ramakrishna Vidyalaya Matric Higher Secondary School

HSC | 2022 – 2023 | 87.33% | SSLC | 2019 – 2020 | All Pass

ACHIEVEMENTS

- Class Topper, M.Tech Computer Science and Engineering (5-Year Integrated) — Academic Year 2023–2024.
- Class Topper, M.Tech Computer Science and Engineering (5-Year Integrated) — Academic Year 2024–2025.
- Presented the BlackBox accident-detection research paper at NCTIACS-26 on 26 Feb 2026---Certificate.

CERTIFICATIONS

- The Complete Ethereum Blockchain Course — Infosys Springboard (Sep 2026)
- Blockchain Basics Course — Cyfrin Updraft (Aug 2026)
- Transition to Web3 — Course 1: Blockchain Basics — Rise In
- Transition to Web3 — Course 2: Transactions and Bitcoin — Rise In
- Blockchain and Its Applications — NPTEL (2026, Score: 58%)

- NPTEL Cloud Computing — Elite Certificate (Jul–Oct 2025, Score: 61%)

LANGUAGES

English, Tamil, Sourastra
